We design, manufacture & install bespoke joinery for projects throughout London and the southeast

COMMERCIAL FIT-OUT

We have fitting experience on varying levels, ranging from renovations and extensions to shop fitting and commercial fit out. We have worked with many well-established fit-out companies, interior designers & project managers, providing all their joinery requirements. As well as managing our own projects.

We take your ideas and craft them with precision, detail & passion. Taking you from concept to completion, smoothly & effortlessly. From workspace tea points, feature walls, banquette seating and more, we allow your commercial space to evolve into the relevant & required fit for your business.

SERVICES

DOMESTIC & RESIDENTIAL

We make the old look new, the new look better and the better look the best!

With a team of vetted, friendly & trusted workers, you will have no doubts about welcoming Forest Joinery into your home. Allow us to create your dream kitchen or construct the perfect fitting wardrobes - give your home some quality loving.

With over 15 years of experience and initially building the company from word-of-mouth recommendations, there is no better team to bring your joinery dreams to life.

Joinery
Package

PORTFOLIO

We had the pleasure of completing two joinery packages for a well-established nationwide furniture supplier. Providing all the joinery requirements on their shop floors to separate the unique room sets throughout the branches.

As well as providing the tea point/ kitchen area in the staff office. After having successfully completed the Orpington branch, we were kindly asked by our client to carry out the same project for the New Malden store. Since then, we have been working closely with our client to deliver several shop fittings for known suppliers across the UK and are proud that our high-quality products, professional craftsmanship and exceptional work ethic secured further projects.

05

Vanquish - One Crown Place

This project is a personal favourite of ours. We worked closely with our client throughout and paid close attention to detail as always. Watching this space transform from concept, design, manufacture to installation, was truly incredible to see. The project saw us creating a large 6x14m feature wall, with a CNC geometric pattern to really bring itself into the spacious lobby. Alongside our wall, sits a bespoke desk weighing in at 400kg, built and installed for the reception staff. All of this is accompanied with an array of complimenting seating and coffee tables to pull together the room in a warm, inviting manner. It was incredible to participate in providing a unique design in one of London's most eye-catching buildings.

07

Woodlands Cafe - YMCA

Forest Joinery delivered a pilot scheme Café for an amazing charity. The Cafe is located amongst a woodland walk and children's play area in Langley.

This project had a tight deadline from the get-go, but our team worked tirelessly to deliver this scheme on time and without any hiccups. Longevity and durability were our top priority, considering what the space was being used for, as well as keeping a clean, slick, comfortable, and inviting environment for the public. We feel honoured to have been a part of an amazing concept and look forward to seeing the space be enjoyed by many for years to come.

08

LIGHTSPEED

Kicking of 2022 with this substantial joinery package. A large provider of ePOS (electronic Point of Sale) solutions, are moving into a brand-new office floor adjacent London Bridge. A huge variety of joinery was required, and we had the pleasure of manufacturing all of the elements.

From tendering to install, this has been a huge job for us, in a commercial world of giants. The team worked tirelessly to bring the very best quality products to our client and install it within a tight deadline. Starting with the tea points and print point we installed fitted cabinets and wall units into alcoves inside the office space and built in white goods were supplied to fit also, We then installed a blend of stone and solid surface worktops to accompany the joinery.

After the first phase of fitting, we continued to put together two tea point islands, one of which was a mammoth 7 meters in size that really stood centre point in the lengthy room.

Our next task was to bring a meeting room to life with a wall-to-wall AV unit in soft touch black laminate featuring two shelving units either side large monitors, all sat on top of a series of cabinets fitted with individual key and lock systems. Shortly after, our bespoke reception desk was ready to be fitted, as a centre piece, it is the first thing you see walking out of the entrance elevators, covering more than half of the width of the reception area, the desk is impossible to miss and understandably draws the eye.

We then went on to install our podiums, a series of 5 podiums of different specifications were situated around the main areas to provide beautiful sitting and standing points for members of staff to meet and collaborate openly.

All in all, a monumental effort from everyone involved to bring this stunning office from concept to real life.

09

UEL PUMPHOUSE

Recently the University of East London has made some investments into its space to create more places for its students to live, study and thrive. One of these places is the UEL Pump House, a cafe/bar in the heart of campus to provide a relaxing spot for students to gather, unwind and find their productivity. We were lucky enough to be a part of this project and provide a café bar area for staff and students on campus.

A rustic hit and miss feature wall along the front edge of the bar was a great touch to bring the orange and yellow tones from the walls into the bar seamlessly, alongside the monochromatic solid surfaces and cabinet combination, as the rest of the room follows towards the rear walls.

The whole café bar is almost framed as an art piece sitting directly next to the large whale and East London mural.

A well thought out room, using very cleverly the natural depth to really bring it all together as one.

A perfect project to be such a part of!

10

Self Portrait

A lovely office fit out for a high end fashion designer at their new base in London.

A big fit out right from the start, this one was a great end product. Our package included;
A full width tea point finished in brushed stainless and mirrors.
A long run of double sided ply drawer packs.
Floating ply cabinets with mirrored backs.
Two floor to ceiling backlit mirrors.

The result of this package was incredible, a brilliant design and a great build. A lot of time and effort put into getting everything perfect, from the inset drawer handles to keep a flush finish, to integrated stainless sinks in the worktops for a seamless finish.

11

Crosstree

A stunning office fit out not far from Liverpool Street, working on this from manufacture to fitting, we provided a varied joinery package, consisting of a tea point area and coffee point area. The tea point, located in a quieter corner of the office floor complete with a sink, integrated appliances and storage space, with the coffee point placed in the middle of the office environment with its own chillers, drawer pack and cupboards, creating a perfect spot to turn making a quick coffee into an informal meeting with a peer. Situated in the main office, we fitted an AV cabinet, with push to open doors to give an undisturbed finished across the room. The whole project across the floor was finished in Egger Hamilton Oak, providing a classy and timeless aesthetic to the entire project.

12

SOCAR

The first thing that pops into your field of vision as the elevator door opens is our slat wall containing the office company sign, a perfect addition to the foyer to provide a great first impression for anybody visiting. We provided the sign along with columns that it sits perfectly in. As you walk into the main office, separating the board room from the rest of the area, along with the glass wall, is another run of our black columns, adding a little extra depth to the room.

Just passed the board room, is our tea point and island, with all integrated appliances, including a tall fridge with an adjoining full length shelving unit.

All navy doors and panels for the tea point and grey for the island both finished with laminate marble effect worktops, along with some oak shelving to create a connection to the flooring installed.

13

Cain International

A unique bar area build, included in which, were a few different things to get around. Along the front face of the bar, we had a glass block wall to be included in the finished product. We had a few different tap and sink systems to be fitted within the worktops in different locations. Even with a few snags to finish up, once we had finalised this project, it was a sight to behold.

14

Media Unit and Dressing Room

We manufactured and installed a fitted media unit, finished to match the existing kitchen, a simple but elegant design, the media unit boasted a centre TV space with shelving either side and cabinets to the underneath.

Upstairs is a walk in wardrobe, wrapped around 3 walls in a horseshoe formation, included within the wardrobes is the usual hanging rail space and shelving with included bespoke drawer packs and pull out shoe storage, as a finishing touch we installed mirrors into the cavity space of the shaker doors across the back wall.

15

Fitted Wardrobes and Study

We provided three separate pieces to our client for their home.

The first, adjoining the en suite, was a fitted wardrobe, finished in a satin white to bring the alcove flush with the wall, inside are 3 hanging rail spaces, a bespoke drawer pack and shelving, on the back of the doors we provide and fit 2 face to face mirrors, so that the client can have a dressing space with the ability to have a 360 degree view of themselves.

The second room was fitted with a larger fitted wardrobe, finished in satin white, again with hanging spaces and shelves, with fully shelved cabinet on one side for plenty of storage room, finished off with a wide full length mirror.

Downstairs the client had an existing desk that she had wanted colour matched to our new fitted cabinet. Once we had built the cabinet, we spent some time to stain the newly manufactured furniture to match the old so the finish was established throughout the room.

16

OUR PROCESS

Enquiry

Our focus is to have a clear understanding of your requirements and ideas for the project. Your passion fires us up, so the more photos, drawings, designs, ideas you have for the project, the better. We will use our expert knowledge to support & guide you with initial concept whilst working tirelessly to tackle any obstacles that arise on the way.

Site Survey

We love the bigger picture, but sometimes the smaller details can be missed. We like to carry out a site survey to ensure the whole project is thought through, even the minute parts. We take pride in our attention to detail so you can relax knowing we have it covered. We are open and honest with our timeframe and workload so you know exactly what to expect from us.

Quotation

We will submit our quotation as soon as possible as we don't like to keep you waiting. All of our quotes are highly detailed and extremely competitive, providing all you need, so the only question you will be asking is 'when can you start!' No hidden fees and with terms easy to understand.

Production

Our office staff & joiners work closely during the manufacturing, meaning that there is no break in communication throughout the whole project process. Allowing the joiners to focus on what they do best – crafting your idea to life. And our office staff are always on hand and available to answer any queries you may have.

Install

We have a dedicated fitting team who have experience in dealing with large scale commercial projects as well as intermate domestic clients. All of our staff are vetted & qualified individuals who reflect our core morals, values & standards.

Aftercare

Our relationship will continue to evolve and flourish, even post project. For us, maintaining an outstanding relationship with all our clients, is key. We offer a warranty on all bespoke products as well as checking in to see how our work is lasting.

17

17 years experience within the industry

Our office & workshop is based in Epping, Essex where we encourage clients to visit, meet the team, view our samples as well as witnessing the joiners hard at work.

Our agenda is to create long lasting, furniture, joinery & relationships with our clients, by producing timeless designs & providing exceptional craftsmanship skills.

ABOUT

Olly began his joinery journey over a decade ago out of the sheer love for creating beautifully unique bespoke furniture & joinery pieces. 17 years on, working from a joiner through to a company director & owner, he is now committed to growing a business that reflects his passion, morals & love for the craft.

Now with a team of 8 dedicated joiners and caring office staff, Forest joinery can expand their services and grow a brand that is long-lasting... just like our products!

To create an effective and productive workspace, we considered many things, not just the tools available and the size of the unit. To utilise the space in the most efficient manner, we built it around the people that spend their time using it. Individual rolling benches to allow each worker their own working areas, but also having the ability to move the room around in order to collaborate during larger projects that may need more hands. Tailored storage across the entire workshop floor keeps quick access to anything that is needed during projects and allows the areas to stay neat and tidy in order to increase productivity. Distractions are at a minimum from separate parts of the workshop using partitioned structures to keep everybody in their teams and fully functioning.

We build & Install highly functional, creative, inspiring spaces and we wanted our own office workspace to encompass just that. Back wall sample storage with under desk cupboard space, A presentation screen for both staff & client meetings. 4 permanent double screen docking spaces with room for another 3 people if necessary to hot desk on busier days in the office. The perfect spot for us to get work done. Within the same four walls, built from the ground up is our tea point, for all the staff to enjoy their breaks in a quieter environment away from the bustle of the workshop.
